1000	109.20	103.20

For all kWh over 1,000 kWh, please use the following procedure to calculate your net bill:

Multiply the kilowatt hours by the appropriate cents per kilowatt as listed below and add the monthly customer charge

SUMMER RATE per kWh: .1012/kWh + Customer Charge

WINTER RATE per kWh: .0952/kWh + Customer Charge

Customer Charge for single-phase service = \$8.00

Customer Charge for three-phase service = \$11.00

Example:

1500 (kWh)
<u>x.1012</u> (summer rate)
151.8
<u>+8.00</u> (customer charge)
159.8 (net bill)
